## DIMENSIONAL WEALTH MODELS

Systematic Investment Solutions Powered by Financial Science

---

Dimensional's Wealth Models embody four decades of expertise in applying the great ideas in finance to global portfolio construction. The models offer a research-driven, systematic framework for pursuing a wide range of investment goals.

▶ **Systematic and transparent approach**

The models are guided by one investment philosophy and a proven implementation process applied consistently across all Dimensional trusts.

▶ **Powered by financial science**

Dimensional is a pioneer in applying academic research to factor-based investing. The models integrate our most advanced thinking on financial theory, research and implementation.

▶ **Targeting higher expected returns**

The allocations use Dimensional trusts designed to go beyond indexing by pursuing higher expected returns in a diversified, cost-effective manner.

# Wealth Models designed to fit specific investment goals

Dimensional Wealth Models are designed for total portfolio emphasis on research-backed drivers of higher expected returns across equity markets (size, value and profitability) and fixed interest markets (term, credit and currency).

1. Sustainability considerations may vary between trusts. Please consult each trust's PDS which can be found at [dimensional.com/funds](https://dimensional.com/funds).

# Built upon a systematic approach to portfolio design

Dimensional Wealth Models are based on decades of academic research and our experience in portfolio design and practical implementation. Our approach to model construction involves these steps:

## Start with the market

We start with global equity and fixed interest markets, which represent a broad and diverse universe of securities from which to assemble a marketwide portfolio.

## Target higher expected returns

We tilt toward securities with higher expected returns. The equity allocations focus on size, value and profitability considerations. The fixed interest allocations look to term, credit and currency where applicable.

## Incorporate specific investment goals

We create model sets that prioritise specific investment goals with allocations to core and sustainability-focused trusts.

All Dimensional trusts used in the models are broadly diversified and designed to pursue higher expected returns while managing risks and costs.

# Offering a broad range of asset allocations

Within each model set, investors can choose from five equity/fixed interest allocations designed to address their specific investment goals and risk preferences. The higher equity allocations are intended for investors focusing on growth of wealth; the higher fixed interest allocations emphasise volatility reduction.

Portfolio allocations range from 100% fixed interest to 100% equity.

For illustrative purposes only. The risk and expected return shown in this illustration are not reliable indicators of the trusts' actual or future risk profiles. There is no guarantee strategies will be successful.

# Harnessing the strength of Dimensional Investing

## ► Focused on investor goals

Each model set offers a thoughtful, research-based framework for pursuing long-term investment goals in a robust and transparent manner.

## ► One philosophy and approach

Dimensional has a deep belief in the power of markets and uses information embedded in market prices throughout its investment process. The models offer an efficient avenue to apply this belief system and investment approach.

## ► Informed by financial science

The models reflect basic principles of asset allocation theory and seek to add value through efficient implementation that combines the benefits of indexing (broad diversification and low cost) with those of systematic active investing (pursuit of higher expected returns, robust portfolio management and flexible trading). The underlying trusts reflect portfolio enhancements arising from our latest advancements in research and implementation.

## ► Offering a consistent, transparent framework

Some industry models may include multiple funds with an inconsistent mix of investment objectives, characteristics and expected outcomes. We believe that our Wealth Models can offer a higher degree of confidence to financial advisors and individual investors when making asset allocation decisions.

## ► Targeting higher expected returns

Across both equities and fixed interest, the model allocations emphasise reliable drivers of higher expected returns and integrate useful information about interactions among premiums. In contrast, many other models either may not target sources of higher expected returns or may target them separately.

## DIMENSIONAL AT A GLANCE<sup>2</sup>

**Dimensional<sup>3</sup> is a global investment manager dedicated to implementing the great ideas in finance.**

We have a long history of applying academic research to practical investing. Today, we offer a full suite of equity and fixed interest strategies designed to target higher expected returns.

Dimensional's investment approach is grounded in economic theory and backed by decades of research. By integrating our investment process with a flexible trading strategy, we work to manage the tradeoffs that arise when implementing portfolios. We consistently apply this process in all of our global and regional equity and fixed interest strategies, with an aim to add value beyond what traditional managers and benchmarks can achieve.

We regard the assets we manage as more than just shares in a portfolio. The money represents the savings, sacrifice, and dreams that investors have entrusted to us. We take this responsibility seriously.

Dimensional is headquartered in Austin, Texas, and has trading offices across North America, Europe, Australia and Asia, which enables us to cover global markets and manage strategies continuously.

2. Firmwide assets under management in AUD (billions), number of employees and offices as at 31 December 2023.

3. "Dimensional" refers to the Dimensional separate but affiliated entities generally, rather than to one particular entity. These entities are Dimensional Fund Advisors LP, Dimensional Fund Advisors Ltd., DFA Australia Limited, Dimensional Fund Advisors Canada ULC, Dimensional Fund Advisors Pte. Ltd., Dimensional Ireland Limited, Dimensional Japan Ltd. and Dimensional Hong Kong Limited. Dimensional Hong Kong Limited is licensed by the Securities and Futures Commission to conduct Type 1 (dealing in securities) regulated activities only and does not provide asset management services.

#### **Glossary**

**Factor-Based Investing:** Investment strategies constructed by sorting companies on quantitative variables to identify securities with higher expected returns.

**Size premium or small cap premium:** The return difference between small capitalisation stocks and large capitalisation stocks.

**Value premium:** The return difference between stocks with low relative prices (value) and stocks with high relative prices (growth).

**Profitability premium:** The return difference between stocks of companies with high profitability and those with low profitability.

**Term premium:** The return difference between bonds with different maturities but similar credit quality.

**Credit premium:** The return difference between bonds of similar maturity but different credit quality.

**Currency of issuance:** The currency in which an asset is issued, such as a USD- vs. AUD-denominated bond.

**Profitability:** Profitability is defined as operating income before depreciation and amortisation minus interest expense divided by book equity.

---

**There is no guarantee an investment strategy will be successful. Diversification neither assures a profit nor guarantees against loss in a declining market.**

**Risks** include loss of principal and fluctuating value. Investment value will fluctuate, and shares, when redeemed, may be worth more or less than original cost.

**Small and micro cap securities** are subject to greater volatility than those in other asset categories.

**International and emerging markets** investing involves special risks, such as currency fluctuation and political instability. Investing in emerging markets may accentuate these risks.

**Fixed interest securities** are subject to increased loss of principal during periods of rising interest rates. Fixed interest investments are subject to various other risks, including changes in credit quality, liquidity, prepayments, call risk, and other factors. Municipal securities are subject to the risks of adverse economic and regulatory changes in their issuing states.

**Sustainability funds** use environmental and social screens that may limit investment opportunities for the funds.

**Real estate investment** risks include changes in real estate values and property taxes, interest rates, cash flow of underlying real estate assets, supply and demand, and the management skill and creditworthiness of the issuer.

DFA Australia Limited ("Dimensional") makes available certain model portfolios ("Dimensional Models") for informational, illustrative and educational purposes only. The Dimensional Models are provided "as is." Dimensional has no obligation to continue to maintain or take any other action with respect to the Dimensional Models and may stop providing any update to the Dimensional Models at any time in its sole and absolute discretion. Dimensional is providing information in the form of Dimensional Models as ideas for possible construction of portfolios centered around the Dimensional Trusts and not as financial product advice, recommendations or research. Dimensional is not responsible for models constructed by a user of the Tool ("User-Constructed Models") or any modifications to the Dimensional Models made by a user of the Tool (the Dimensional Models and the User-Constructed Models, and any user modifications thereto, collectively, the "Models"). Dimensional is not responsible for implementing the Models (e.g., selecting brokers, executing trades or seeking best execution).

Dimensional is not providing any investment, tax or financial product advice to any investment professional or their clients, and has no obligation to and will not take into account the tax status, investment objectives, financial situation or needs of any investment professional or their clients when compiling the Dimensional Models. Dimensional is not acting as a fiduciary to any investment professional or their clients, nor is any investment professional or their client entering into any type of advisory or other relationship with Dimensional. The investment decisions made by any investment professional or their clients based on the Dimensional Models provided shall be at the investment professional's or such client's own risk and Dimensional makes no guarantee as to the merits of any Dimensional Model or Dimensional Trusts selected for a Model. The Dimensional Models are not intended as a sufficient basis on which to make an investment decision. Certain investments included in the Models may not be suitable for investors, nor do they represent a complete investment program.

To the fullest extent permitted by applicable law, Dimensional shall have no liability, including with respect to the accuracy of any data or caused by any action taken in reliance upon the Dimensional Models, to any investment professional or their clients in relation to the Dimensional Models.

Any indices shown are intended for comparative purposes only and may differ significantly from the Models. Dimensional makes no representations as to the appropriateness of any of the indices in comparison to the Models. The risk factors, benefits and disadvantages of the indices and Models may vary greatly and should be considered alongside fund characteristics, holdings and past performance figures stated. Although the Models were created using information developed internally and/or obtained from sources believed to be reliable, Dimensional does not guarantee the accuracy, adequacy or completeness of such information.

The Dimensional research and portfolio management teams (the "Model Team") developed the Dimensional Models. The Model Team, with oversight from Dimensional's Investment Committee, generally expects to select funds for the Models managed by Dimensional ("Dimensional Trusts") without considering the universe of funds sponsored by persons not affiliated with Dimensional or its affiliates ("Third Party Funds"), even though there may or may not be Third Party Funds that may be more appropriate for inclusion in such Dimensional Models. To the extent a user implements all or part of a Model, this will generate advisory and other fees for Dimensional or its affiliate, and the management fees of Dimensional Trusts may be higher than fees charged by Third Party Funds. The Dimensional Models asset allocation represent the selected target asset mix as determined by the Model Team and as of the date it is provided.

The risks of the Dimensional Models are subject to the risk of the Dimensional Trusts, which can be found in the applicable Dimensional Trust Product Disclosure Statement (PDS). The selection of Dimensional Trusts and the allocation and reallocation of Dimensional Model assets may not produce a desired result.
